

oil transfer equipment - hand operated

suction gun

C16

The C16 is ideal for use with mineral oils to get them both into and out of gearboxes, transfer cases and differentials. Another useful application is to use the C16 to evacuate the sump of an inboard marine engine.

Features

- suitable for use with mineral oils up to SAE 90
- 500 mL capacity
- 10 year parts availability
- 5 year warranty

gear oil pumps

C11 Gear Oil Pump (205 L drums)

C13 Gear Oil Pump (60 L drums)

These fully serviceable, long life, low cost pumps have been engineered for trouble free use specifically for heavy gear oils.

Features

- ideal for pumping heavier gear oils up to SAE 140
- supplied with a 1.8 m (6 ft) delivery hose with non drip nozzle and built-in hose hanger
- an optional CF strainer for auto transmission and hydraulic fluids also available
- 10 year parts availability
- 5 year warranty

Specifications

- **wetted components:**
